| 1. Identification of the      | 1.1 Product Identifier  |
|-------------------------------|---|
| Substance/Mixture and of      | Material Name: Apiezon Wax W40.   |
| the Company/Undertaking       | 1.2 Relevant identified uses of the substance or mixture and uses advised against   |
|                               | Product Use: Medium hardness vacuum sealing / mounting wax.   |
|                               | Uses advised against: None.   |
|                               | 1.3 Details of the supplier of the substance or mixture   |
|                               | <b>Company:</b> M&I Materials Ltd., Hibernia Way, Trafford Park, Manchester, M32 0ZD, UK.   |
|                               | Telephone: +44 (0)161 864 5409.   |
|                               | Emergency Telephone: +44 (0)161 864 5439.   |
|                               | Email: RussellMartin@mimaterials.com.   |
| 2. Hazards Identification     | This product is not classified as hazardous and this document has been compiled for   |
|                               | information purposes, in accordance regulation 1907/EC/2006, Annex II, as amended   |
|                               | by Regulation (EU) No. 453/2010 and OSHA hazard communication guidelines.   |
|                               | 2.1 Classification of the substance or mixture<br>Regulation (EC) No 1272/2008 (CLP): Not classified.   |
|                               |   |
|                               | 2.2 Label elements  |
|                               | Regulation (EC) No 1272/2008 (CLP): No symbol or signal word.   |
|                               | 2.3 Other hazards   |
|                               | Traces of hydrogen sulphide may be liberated at high temperatures. Hydrogen   |
|                               | sulphide may accumulate in confined spaces and is highly toxic if inhaled in sufficient   |
|                               | concentrations. See 4.2 for further information. Contact with hot material can cause thermal burns.   |
|                               |   |
| 3. Composition/Information on | 3 Mixture   |
| Ingredients                   | CAS No: 64741-56-6.   |
|                               | CAS No: 8012-95-1.<br>All constituents are listed on the TSCA inventory.  |
|                               |   |
| 4. First Aid Measures         | 4.1 Description of first aid measures   |
|                               | Inhalation: If inhalation of mists, fumes or vapour causes irritation remove to fresh air   |
|                               | If casualty does not rapidly recover seek medical attention.  |
|                               | <b>Skin:</b> In the case of contact with hot product flush affected area with cold water, do not attempt to remove wax. Cover with sterile dressing and obtain medical attention. |
|                               | <b>Eyes:</b> If in contact with hot product cool the area by flushing with large amounts of   |
|                               | cold water. Do not attempt to remove the wax from the burn area. Seek medical   |
|                               | attention. If in contact with cold product flush the eye with copious amounts of water, i   |
|                               | persistent irritation occurs seek medical attention.  |
|                               | Ingestion: Do not induce vomiting, obtain medical attention.  |
|                               | 4.2 Most important symptoms and effects, both acute and delayed   |
|                               | If exposed to hydrogen sulphide fumes the effects will depend on the airborne   |
|                               | concentration - 0.02ppm odour threshold, smell of rotten eggs; 10ppm eye and  |

|  | respiratory tract irritation.   |
|--|---|
|  | <b>4.3 Indication of any immediate medical attention and special treatment needed</b><br>In the case of burns do not remove the wax from the skin, it will provide an airtight<br>sterile covering, which will eventually fall away with the scab as the burn heals. If<br>removal is attempted mineral oil (not mineral spirits) or a mineral oil based ointment<br>may be applied to help soften the product. |
| 5. Fire Fighting Measures                    | <b>5.1 Extinguishing media</b><br>Carbon dioxide, dry powder, foam or water fog. Do not use water jets.   |
|  | <b>5.2 Special hazards arising from the substance or mixture</b><br>Combustion products include carbon monoxide.  |
|  | <b>5.3 Advice for fire fighters</b><br>Protective equipment including breathing apparatus must be worn when approaching a fire in a confined space.   |
| 6. Accidental Release<br>Measures            | <b>6.1 Personal precautions, protective equipment and emergency procedures</b><br>Avoid contact with eyes. Hot product should be handled so that there is no risk of burns.   |
|  | 6.2 Environmental precautions<br>No special precautions required.   |
|  | <b>6.3 Methods and material for containment and cleaning up</b><br>Molten material should be allowed to cool and solidify before collecting for disposal.   |
| 7. Handling and Storage                      | 7.1 Precautions for safe handling<br>Avoid contact with hot material to prevent burns.  |
|  | <b>7.2 Conditions for safe storage, including any incompatibilities</b><br>No special precautions required.   |
|  | 7.3 Specific end use(s)<br>No special precautions required.   |
| 8. Exposure Controls/<br>Personal Protection | <ul> <li>8.1 Control parameters</li> <li>At ambient temperature wax has very low volatility, so development of fumes is highly unlikely. At high temperatures hydrogen sulphide may be released.</li> <li>Workspace Exposure Limits:</li> </ul>   |
|  | Substance8hr TWASTELSourceHydrogen sulphide7mg/m³ (5ppm)14mg/m³ (10ppm)EH40   |
|  | <ul> <li>8.2 Exposure controls</li> <li>The level of controls depends on the use. In most cases very small quantities of material are used. If heating to apply wax ensure adequate ventilation. Eye washes should be available for emergency use.</li> <li>Respiratory protection: None required.</li> </ul>   |

|                               | Hand protection: Wear heat resistant gloves when handling or applying hot wax. Eye protection: Wear eye protection when handling/applying hot wax.                           |
|-------------------------------|--|
| 9. Physical and Chemical      | 9.1 Information on basic physical and chemical properties  |
| Properties                    | Appearance: Black solid. Liquid at high temperature.   |
|                               | Odour: None at ambient.  |
|                               | <b>pH</b> : Not applicable.  |
|                               | Melting point: 40 to 50°C  |
|                               | Initial boiling point and boiling range: >320°C.   |
|                               | Flash point: 320°C.  |
|                               | Flammability (solid, gas): Data not available.   |
|                               | Upper/lower flammability or explosive limits: Data not available.  |
|                               | <b>Vapour pressure:</b> Approx 6 x 10 <sup>-8</sup> Torr at 20°C.  |
|                               | Vapour density: Not applicable.  |
|                               | Relative density: 1.017 at 20°C.   |
|                               | Water solubility: Insoluble.   |
|                               | Solubility: Soluble in aromatic hydrocarbon solvents.  |
|                               | Partition coefficient: n-octanol/water: Data not available.  |
|                               | Auto-ignition temperature: >400°C.   |
|                               | <b>Decomposition temperature:</b> Data not available.  |
|                               | Viscosity: Not applicable.   |
|                               | Explosive properties: Data not available.  |
|                               |  |
|                               | Oxidising properties: Data not available.  |
|                               | 9.2 Other information  |
|                               | Not applicable.  |
| 10. Stability and Reactivity  | 10.1 Reactivity  |
|                               | Stable under normal conditions of use.   |
|                               |  |
|                               | 10.2 Chemical stability  |
|                               | Stable under normal conditions of use.   |
|                               | 10.3 Possibility of hazardous reactions  |
|                               | Data not available.  |
|                               | 10.4 Conditions to avoid   |
|                               | Temperatures >105°C.   |
|                               | 10.5 Incompatible materials  |
|                               | Strong oxidising agents.   |
|                               |  |
|                               | 10.6 Hazardous decomposition products  |

# Safety Data Sheet

January 2018 Page 4 of 5

|                             | Acute oral toxicity: Low toxicity: LD50 >5000mg/kg.                                      |
|-----------------------------|--|
|                             | Acute dermal toxicity: Expected to be of low toxicity: LD50 >2000mg/kg.                  |
|                             | Acute inhalation toxicity: Low volatility makes inhalation unlikely. Avoid vapours       |
|                             |  |
|                             | from heated materials which may cause irritation.  |
|                             | Skin/eye corrosion/irritation: Expected to be slightly irritating. Hot material may      |
|                             | cause burns.   |
|                             | Respiratory or skin sensitization: Not expected to be a skin sensitizer.                 |
|                             | Aspiration hazard: Not considered an aspiration hazard.                                  |
|                             | Carcinogenicity/mutagenicity: Not considered a mutagenic hazard or carcinogen.           |
|                             | This product is not considered to be a carcinogen by IARC, ACGIH, NTP or OSHA.           |
|                             |  |
| 12. Ecological Information  | When used and/or disposed of as indicated no adverse environmental effects are           |
|                             | foreseen. Ecotoxicological effects based on knowledge of similar substances.             |
|                             | 12.1 Toxicity  |
|                             | Expected to be practically non-toxic.  |
|                             |  |
|                             | 12.2 Persistence and degradability   |
|                             | Not regarded as inherently biodegradable.  |
|                             | 12.3 Bioaccumulative potential   |
|                             | Has the potential to bioaccumulate.  |
|                             |  |
|                             | 12.4 Mobility in soil  |
|                             | Product has low mobility in soil.  |
|                             | 40.5 Describes (DDT and s D dD essential)  |
|                             | 12.5 Results of PBT and vPvB assessment  |
|                             | The product does not meet criteria for toxicity which requires further assessment. It is |
|                             | not considered PBT or vPvB.  |
|                             | 12.6 Other adverse effects   |
|                             | No other adverse effects envisaged.  |
|                             |  |
| 13. Disposal Considerations | 13.1 Waste treatment methods   |
|                             | Product and packaging must be disposed of in accordance with local and national          |
|                             | regulations. May be incinerated. Unused product may be returned for reclamation.         |
|                             |  |
| 14. Transport Information   | Not classified as hazardous under air (ICAO/IATA), sea (IMDG), road (ADR) or rail        |
|                             | (RID) regulations.   |
