

True UHV - High Power

The ARS manufactured **CS210*B** is our most powerful True UHV cold head (10^{-11} Torr). As with our other True UHV cryocoolers all of the rubber o-ring seals have been replaced with welded joints and metal seals. A CF flange is directly welded to the cryocooler.

These True UHV systems are bakeable to 80C, and the 10K **CS210AB** is bakeable to 200C if the displacer is removed. (Special training required)

Cold tip extensions are available to put the sample right where it is needed in the chamber.
